050 BALL HEAD SERIES

Extremely lightweight and precise, the Manfrotto professional head provides the very best in controlled and smooth movements to minimize effort and maximize top results.

Magnesium means lightweight precision!

050 BALL HEADS

The new 057, 055 and 054 lightweight magnesium ball heads are the ideal choice for all premium carbon fiber tripods. This pro ball head range represents ten extremely precise ball heads of excellent design and quality, providing the very best in smooth, controlled movements thanks to the self-lubricating ring which ensures greater precision and control. The 050 ball head also features the unique, innovative solution of portrait functions, which offers the possibility of choosing to position the camera

vertically at a perfect 90° angle or tilting the angle up to 105°-110° when shooting from uneven ground. Improved comfort, speed in operation, high rapidity and elegant design: the number one choice for carbon fiber tripods. The 057, 055 and 054 pro heads are engineered to guarantee durability, high performance and accuracy, to minimize effort and maximize top results.

KEY FEATURES

- New ergonomic levers
- Improved plate design for fast and comfortable attachment and detachment of camera
- Exclusive 90°-105° portrait angle selector
- Lightweight magnesium body
- Large movement angles
- Self-lubricating ring

KEY BENEFITS

- Ultra precise, smooth movement
- Advanced settings and exclusive features
- Lightweight, durable materials and construction
- Versatility in movement and camera position
- Enhanced ergonomics for increased speed and comfort

90°-105° Portrait Selector. More versatility for vertical shooting both indoors and outdoors.

Lightweight magnesium body.

054

10KG MAX LOAD

Recommended for 190 carbon fiber tripods, the 054 heads represent the most compact, versatile and highest performing ball heads, with outstanding design and advanced ergonomics. The 054 range consists of one ball head with a traditional disc attachment; one with a Q2 quick release another with a Q5 quick

release. All incorporate a robust magnesium body with improved lightness, providing smooth movement, exclusive features and are ultra lightweight.

Available with a wide range of camera attachments, the 054 heads are ideal for traveling.

055

12KG MAX LOAD

The 055 ball head range is the perfect partner for 055 carbon fiber tripods and offers a wide range of QR attachments which have been ergonomically improved to maximize speed and comfort when attaching and detaching the camera. The 055 range comprises 4 ball heads: one with a traditional disc attachment;

another one with a Q2 quick release; one with a Q5 quick release system with increased ergonomics, speed and accuracy thanks to three leveling bubbles; a ball head with a RC4 quick release system, ideal for use with heavy equipment and long lenses thanks to its large contact area.

057

15KG MAX LOAD

The 057 range, recommended for 057 carbon fiber tripods, comprises 3 ball heads: one version features a traditional disc attachment; another has a ball head with a RC4 quick release system, perfect for heavy equipment and long lenses; and the third

boasts the new magnesium Q5 quick release system that offers increased ergonomics, speed, reduced weight and accuracy – thanks to 3 leveling bubbles. The 057 heads represent the highest performing solutions especially for studio and outdoor applications.
